AI agent readiness audit

20 questions across 5 parts of your business. Find out where an AI agent would make the biggest difference, and where you're already ahead.

Lead response	/ 12 pts
Customer support	/ 12 pts
Scheduling	/ 12 pts
Admin and operations	/ 12 pts
Growth and retention	/ 12 pts

Not every business is ready for AI agents in the same way. This audit shows where yours stands.

Most businesses assume AI automation is either "not for them" or something to figure out later. This audit cuts through that. It maps five areas where repetitive work tends to pile up, and scores each one on how often your team still does things by hand that a well-built AI agent could handle instead.

Answer each question honestly. There are no right answers to aim for, only an accurate picture of where your time is going and where a few well-placed agents would give it back.

A

Lead response and sales

How fast and consistently you reply to new interest.

B

Customer support

How much support volume your team handles by hand.

C

Scheduling and booking

How efficiently appointments and availability are managed.

D

Admin and operations

How much data entry, filing and follow-through your team owns.

E

Growth and retention

How consistently you follow up, re-engage and ask for reviews.

MAX SCORE

60 points

12 per section. Lower scores mean more opportunity to automate.

HOW SCORING WORKS

0-1 pts

Fully manual today.

2 pts

Partly systemized.

3 pts

Mostly handled.

Then

Circle the option that fits best. Total each section, then add all five at the end.

A Lead response and sales

4 QUESTIONS · MAX 12 PTS

A1 When a new lead comes in through your website or social, how fast do they usually get a response?

- ☐ Hours, or the next day (0) ☐ Within the hour, sometimes (1) ☐ Under 10 minutes, usually (2) ☐ Instant, automated reply (3)

A2 What happens to leads who don't convert on the first contact?

- ☐ Nothing, they go cold (0) ☐ Someone follows up manually (1) ☐ One or two reminders go out (2) ☐ Automated multi-step nurture (3)

A3 How are qualifying questions handled before a sales conversation?

- ☐ Typed out fresh each time (0) ☐ Copied from a template (1) ☐ A form, but reviewed manually (2) ☐ Fully automated intake and routing (3)

A4 How do you handle interest that comes in outside business hours?

- ☐ It waits until someone's in (0) ☐ Auto-reply, but no action (1) ☐ Forwarded to someone (2) ☐ An agent responds and qualifies (3)

SECTION A SCORE

____ / 12

- 0-4 High automation opportunity in lead response
5-9 Some systems in place. Worth tightening.
10-12 Well covered. Focus elsewhere.

B Customer support

4 QUESTIONS · MAX 12 PTS

B1 What share of your inbound support messages are repeat questions you've answered many times?

- ☐ Most of them (0) ☐ About half (1) ☐ A quarter or less (2) ☐ Rare, we have an FAQ or bot (3)

B2 How are basic status updates handled? ("Where's my order?" "When's my appointment?")

- ☐ Someone looks it up manually (0) ☐ Copied and pasted from a system (1) ☐ Self-serve link in the email signature (2) ☐ Automated lookup and reply (3)

B3 Do urgent support issues get prioritized automatically?

- ☐ No, everything goes to one inbox (0) ☐ Sometimes sorted by hand (1) ☐ Basic tagging or categories (2) ☐ Auto-routed by type and urgency (3)

B4 What happens when a customer gets in touch at 10pm on a Sunday?

- ☐ They wait until Monday (0) ☐ A generic "we'll reply soon" (1) ☐ Routed to an on-call person (2) ☐ An agent handles it in real time (3)

SECTION B SCORE

____ / 12

- 0-4 Support volume is draining your team. A high-return place to start.
5-9 A decent base. An agent could plug the remaining gaps.
10-12 Support is well handled.

C Scheduling and booking

4 QUESTIONS · MAX 12 PTS

C1 How do clients or prospects book time with you or your team?

- ☐ Back-and-forth by email or phone (0) ☐ A booking link, shared manually (1) ☐ A booking link on your site (2) ☐ An agent books it in the conversation (3)

C2 How do you reduce no-shows and last-minute cancellations?

- ☐ We don't have a system (0) ☐ The occasional manual reminder (1) ☐ Automated reminders, no reply needed (2) ☐ Reminders with easy, automatic rescheduling (3)

C3 When a client wants to reschedule, what's the process?

- ☐ Fully manual, someone handles each one (0) ☐ They email us and we sort it (1) ☐ Self-serve link, but staff confirm (2) ☐ Fully self-serve with calendar sync (3)

C4 After a completed appointment or job, what happens automatically?

- ☐ Nothing, until someone does it (0) ☐ Someone follows up later that day (1) ☐ An automated thank-you, then nothing (2) ☐ Review request, next booking and invoice, all automatic (3)

SECTION C SCORE

____ / 12

- 0-4 Scheduling friction is costing you bookings and time.
5-9 Mostly working, but follow-through gaps remain.
10-12 Tight scheduling.

D Admin and operations

4 QUESTIONS · MAX 12 PTS

D1 How does new client or contact information get into your systems?

- ☐ Someone types it in by hand (0) ☐ Copied from emails or forms (1) ☐ Forms sync to one system (2) ☐ Captured and synced across tools automatically (3)

D2 How are invoices and payment follow-ups handled?

- ☐ Created and sent by hand, every time (0) ☐ Templates, but sent manually (1) ☐ Invoices automated, reminders manual (2) ☐ Invoices, reminders and receipts all automated (3)

D3 How current is your CRM or client database, usually?

- ☐ Weeks behind, or barely kept (0) ☐ Updated when we remember (1) ☐ Updated after each interaction (2) ☐ Updated automatically in real time (3)

D4 After a call or meeting, how do notes and action items get recorded?

- ☐ Rarely, or from memory later (0) ☐ Typed up by hand after the call (1) ☐ A template, filled in and saved (2) ☐ Summarized and logged automatically (3)

SECTION D SCORE

____ / 12

- 0-4 Admin is quietly absorbing hours every week.
5-9 Decent systems. A few agents would close the gaps.
10-12 A well-automated back office.

E Growth and retention

4 QUESTIONS · MAX 12 PTS

E1 How consistently do you ask for reviews after a completed job or service?

- ☐ Rarely or never (0) ☐ Occasionally, if we remember (1) ☐ We try, but it's inconsistent (2) ☐ Automated, it goes out every time (3)

E2 What do you do with past customers who haven't come back in 60 to 90 days?

- ☐ Nothing, we wait for them (0) ☐ Someone reaches out now and then (1) ☐ The occasional newsletter or email blast (2) ☐ An automated re-engagement sequence (3)

E3 When someone attends an event, webinar or consultation but doesn't buy, what's the follow-up?

- ☐ One email, maybe, then nothing (0) ☐ Manual follow-up from sales (1) ☐ A 2 to 3 email sequence (2) ☐ Follow-up triggered by what they do (3)

E4 How do you tell existing customers about product updates, promotions or seasonal campaigns?

- ☐ We don't, consistently (0) ☐ Social posts, now and then (1) ☐ A monthly email, written by hand (2) ☐ Segmented, scheduled and automated (3)

SECTION E SCORE

____ / 12

0-4 You're leaving repeat business and re-engagement on the table.
5-9 A solid base. More consistency would compound results.
10-12 Strong retention.

TOTAL

____ / 60

What your score means

Your total shows how much room you have for AI automation, and where to start. Lower scores mean more opportunity. Higher scores mean a good foundation to build on. Either way, start with your lowest sections.

0–18

HIGH OPPORTUNITY

Your business still runs almost entirely on manual effort

You're spending real hours every week on things that don't need a person. The good news: even one or two well-placed AI agents can make a big difference. Your lowest-scoring sections are the best place to start.

19–39

READY NOW

You have the right foundations, and clear gaps worth closing

This is the most common range. You've built some systems, but in 2 or 3 areas manual work is still the default. Those are exactly where a targeted agent adds the most, without disrupting what already works.

40–60

SCALE UP

You're already well systemized. The opportunity is scale.

You've done the hard work of building repeatable processes. Now AI agents help you go further: handling more volume, personalizing at scale, or adding intelligence to workflows that run on simple automation today.

WHERE TO START FIRST

Look at your **two lowest section scores**. Those are your best starting points for an AI agent. Most businesses start with one agent on their weakest area, then expand from there.

You've done the audit. Now let's build your agents.

Sign up free and start with your two lowest sections. Tell us the job in plain English, and we build and run the agent for you.
