```

AI Agent Readiness Audit

20 questions across 5 business dimensions. Find out exactly where an AI agent would make the biggest difference — and where you're already ahead.

Not all businesses are ready for AI agents in the same way.

This audit tells you where **yours** actually stands.

Most businesses assume AI automation is either "not for them" or something to figure out later. This audit cuts through that. It maps five areas where repetitive work tends to pile up — and scores each one based on how often your team is still doing things manually that a well-built AI agent could handle instead.

Answer each question honestly. There are no right answers to aim for — only an accurate picture of where your time is going, and where a few well-placed agents would give it back.

A

Lead Response & Sales

How fast and consistently you respond to new inbound interest.

B

Customer Support

How much support volume gets handled manually by your team.

C

Scheduling & Booking

How efficiently appointments and availability are managed.

D

Admin & Operations

How much data entry, filing, and follow-through your team owns.

E

Growth & Retention

How consistently you follow up, re-engage, and ask for reviews.

★

Max score: 40 pts

8 points per section. Higher = more opportunity to automate.

// HOW SCORING WORKS

● 0–1 pts per question: Fully manual today

● 2 pts: Partly systemized

● 3 pts: Mostly handled

● Circle the option that best fits. Total per section. Add all five at the end.

**A Lead Response & Sales**

4 questions · max 8 pts

A1 — When a new lead comes in through your website or social, how fast do they typically get a response?

- ☐ Hours or next day (0) ☐ Within the hour, sometimes (1) ☐ Under 10 mins, usually (2) ☒ Instant, automated reply (3)

A2 — What happens to leads who don't convert on the first contact?

- ☐ Nothing — they go cold (0) ☐ Someone follows up manually (1) ☐ One or two reminders go out (2) ☒ Automated multi-step nurture (3)

A3 — How are qualifying questions handled before a sales conversation?

- ☐ Typed out fresh each time (0) ☐ Copied from a template (1) ☐ Form, but manually reviewed (2) ☒ Fully automated intake + routing (3)

A4 — How do you handle inbound interest that comes in outside business hours?

- ☐ It waits until someone's in (0) ☐ Auto-reply, but no action (1) ☐ Forwarded to someone (2) ☒ Agent responds & qualifies (3)

SECTION A
SCORE

---- / 8

0–3: High automation opportunity in lead response
4–6: Some systems in place — worth tightening
7–8: Well-covered — focus elsewhere

B Customer Support

4 questions · max 8 pts

B1 — What share of your inbound support messages are repetitive questions you've answered many times?

- ☐ Most of them (0) ☐ About half (1) ☐ A quarter or less (2) ☒ Rare — we have an FAQ/bot (3)

B2 — How are basic status updates handled? ("Where's my order / appointment?")

- ☐ Someone looks it up manually (0) ☐ Copy-paste from a system (1) ☐ Self-serve link in signature (2) ☒ Automated lookup & reply (3)

B3 — Do you have a way to triage incoming support so urgent issues get prioritized automatically?

- ☐ No — everything goes to one inbox (0) ☐ Manually sorted sometimes (1) ☐ Basic tagging or category (2) ☒ Auto-routed by type & urgency (3)

B4 — What happens when a customer reaches out at 10pm on a Sunday?

- ☐ They wait until Monday (0) ☐ Generic "we'll reply soon" (1) ☐ Routed to on-call person (2) ☒ Agent handles it in real time (3)

SECTION B
SCORE

---- / 8

0–3: Support volume is a drain on your team — high ROI target
4–6: Decent base — an agent could plug the remaining gaps
7–8: Support is well-handled

C

Scheduling & Booking

4 questions · max 8 pts

C1 — How do clients or prospects book time with you or your team?

- ☐ Email or phone back-and-forth (0) ☐ Calendly-style link, manually shared (1) ☐ Link embedded on site (2) ☒ Agent books within the conversation (3)

C2 — How do you reduce no-shows and last-minute cancellations?

- ☐ We don't have a system (0) ☐ Occasional manual reminder (1) ☐ Automated reminders (no response needed) (2) ☒ Reminder + easy reschedule, auto-handled (3)

C3 — When a client wants to reschedule, what's the process?

- ☐ Fully manual — someone handles each one (0) ☐ They email us and we sort it (1) ☐ Self-serve link, but staff confirm (2) ☒ Fully self-serve with calendar sync (3)

C4 — After a completed appointment or job, what happens automatically?

- ☐ Nothing, until someone does it (0) ☐ Someone follows up later that day (1) ☐ Automated thank-you, but no follow-through (2) ☒ Review request, next booking prompt, invoice — all automatic (3)

SECTION C
SCORE

---- / 8

0–3: Scheduling friction is costing you bookings and time
4–6: Mostly working, but follow-through gaps remain
7–8: Tight scheduling ops

D

Admin & Operations

4 questions · max 8 pts

D1 — How does new client or contact information get into your systems?

- ☐ Someone types it in manually (0) ☐ Copied from emails or forms (1) ☐ Forms sync to one system (2) ☒ Auto-captured and synced across tools (3)

D2 — How are invoices and payment follow-ups handled?

- ☐ Created and sent by hand, each time (0) ☐ Templates used, but sent manually (1) ☐ Invoices automated, reminders manual (2) ☒ Fully automated: invoice + reminders + receipts (3)

D3 — How current is your CRM or client database, typically?

- ☐ Weeks behind, or barely maintained (0) ☐ Updated when we remember (1) ☐ Updated after each interaction (2) ☒ Auto-updated in real time (3)

D4 — After a call or meeting, how do notes and action items get recorded?

- ☐ Rarely — or from memory later (0) ☐ Typed up manually after the call (1) ☐ Template filled in, saved somewhere (2) ☒ Auto-summarized and logged (3)

SECTION D
SCORE

---- / 8

0–3: Admin overhead is quietly absorbing hours every week
4–6: Decent systems — a few agents would eliminate the gaps
7–8: Well-automated back office

E

Growth & Retention

4 questions · max 8 pts

E1 — How consistently do you request reviews after a completed job or service?

- ☐ Rarely or never (0) ☐ Occasionally, if we remember (1) ☐ We try, but it's inconsistent (2) ☒ Automated — goes out every time (3)

E2 — What do you do with past clients or customers who haven't returned in 60–90 days?

- ☐ Nothing — we wait for them to reach out (0) ☐ Someone reaches out occasionally (1) ☐ Occasional newsletter or blast (2) ☒ Automated re-engagement sequence (3)

E3 — When someone attends an event, webinar, or consultation but doesn't buy — what's the follow-up process?

- ☐ One email, maybe — then nothing (0) ☐ Manual follow-up from sales (1) ☐ 2–3 touch email sequence (2) ☒ Behaviour-triggered nurture flow (3)

E4 — How do you communicate product updates, promotions, or seasonal campaigns to existing customers?

- ☐ We don't, consistently (0) ☐ Social posts, ad hoc (1) ☐ Monthly email, manually written (2) ☒ Segmented, scheduled, automated (3)

SECTION E
SCORE ----- / 8

0–3: Significant retention and re-engagement revenue being left on the table
4–6: Solid base — more consistency would compound results
7–8: Strong retention ops

What your score means

Your total score tells you how much runway you have for AI automation — and where to start. Lower scores mean more opportunity. Higher scores mean a good foundation to build on. Either way, the sections where you scored lowest are the ones to address first.

0–12

HIGH OPP.

Your business is still running almost entirely on manual effort

You're spending real hours every week on things that don't need a person. The good news: the lift from even one or two well-placed AI agents tends to be significant — and fast. Your lowest-scoring sections are the highest-return starting points.

13–26

READY NOW

You have the right foundations — and clear gaps worth closing

This is the most common range. You've built some systems, but there are still 2–3 dimensions where manual work is the default. Those are exactly the spots where a targeted agent delivers outsized value without disrupting what's already working.

27–40

SCALE UP

You're already well-systematized — the opportunity is in scale

You've done the hard work of building repeatable processes. At this stage, AI agents help you go further: handling higher volume, personalizing at scale, or adding intelligence to workflows that are currently running on simple automation.

// WHERE TO
START FIRST

Look at your **two lowest section scores** — those are your highest-leverage starting points for an AI agent. Most businesses start with one agent covering their weakest area, see results within the first month, then expand from there.

You've done the audit. Now let's build the agents.

Bring your scores to a free 20-minute call. We'll map your two lowest sections to a specific agent design — and tell you exactly what it would automate, how long it takes to build, and what it costs to run.

01

Share your scores

Tell us which sections scored lowest. No tech knowledge needed — just your honest answers from this audit.

02

We map your agents

Our team designs an agent workflow specifically for the gaps you identified — connected to the tools you already use.

03

You go live fast

Most agents are fully built and deployed within days. We host and monitor everything — you just watch it run.

// SIMPLE PRICING

Most businesses start by automating their **single lowest-scoring section** — one focused agent workflow.

\$600/mo per agent
hosting, monitoring & updates included
+ \$1,000 one-time setup
design, build & deployment
